My name is Craig Keener, and I offer home repairs, maintenance & improvements in Lancaster County, PA. I'm professional, friendly, and efficient and the one to call when you want something done right the first time. I communicate clearly, I show up when I say I will, and do my best to provide you with quality services to impress.

My Story

I have been doing home improvements, repairs and maintenance for many years and decided to start my own business. I have the passion and experience to expertly provide many services around your home. I really enjoy my work and the people I meet along the way. My vast and unique skill set gained over the years allows me to repair just about anything. I take great pride in a job well done and also have the wisdom to only undertake jobs that I have experience

doing well and are in my comfort zone. I am not too proud to admit that a project is more than I am able to complete. I will provide a referral before jeopardizing our trust. This is why our name says "solutions" and not "services". I do this work because I enjoy helping people and working with my hands. I'm an all-around handy guy that would love to help with your repairs, maintenance and home improvements. Your safety is of the utmost importance to me. I adhere to all building, plumbing, and electrical codes. When it comes to safety, I treat your home like my family lives there.

Why should you choose me as your handyman?

I will:

- Provide high quality work and pay attention to detail.
- Communicate effectively to keep you in the loop.
- Show up when I say I will.
- Treat you respectfully, honestly, and fairly.
- Offer flexible hours to meet your needs.
- Accept major credit/debit cards, PayPal, e-Invoice, check or cash
- Have current FBI, PA State Police & PA Childline Clearances
- I may not be the cheapest handyman in town, but I will often save you money in the long run. I don't surprise you with hidden fees. I do it right the first time. I will only recommend fixing things that are actually broken.

How to hire me

Your best option is to go to my website and click the contact button and fill out the web form online to describe what you need help with. You can also email or call me, but I'm often working for a customer and may have to return your message as soon as possible. I know that's not ideal, but it helps me keep first things first and respect all of my customers. I am not the guy who will be on the phone or computer all day while I am working on a project at your home. Please let me know your choice of response: phone call, text, or email.
